Greifswald, October 2020

Dear patients,

sadly I need to inform you after long debates that we will have to close the Institute for Pigmentary Disorders in Greifswald from

### January 1st, 2021

for clinical service for all patients.

You can be assured that I do know that this is not a good message. However, as you all know these times are very trying for everybody. This is also the same in our situation. We need to be realistic with our sources.

I can ensure you that I with my team, especially Mrs Angela Panske, have always tried our very best to support and guide you in your very special journey with vitiligo.

We are proud that we were able to help so many. Unfortunately not everybody...

I would like to take the opportunity to thank all of you for your trust and believe in us over so many years. It has been a pleasure to serve you in your needs.

From the bottom of my heart I wish you all the best for your personal life. And do not forget that you are what you are with or without vitiligo.

Stay safe on your soul and body.

We will miss you dearly.

Very best wishes

Professor and her team
